Ex-Handy 10 CLASSIC MODE— Set Your Own Priorities

H10 Classic Mode – another digital product from ecom

Using the power of our Digital Services we provide you with a preconfigured Ex-Handy 10 which focuses on the main purpose: being a phone.

Besides limiting the device to phone relevant functions and restricting Android™ features to even further enhance performance of core functions, it's still packed with features which allow for a comfortable "phone only" operation.

NIX Agent

- Tool to load configuration on the phone using eDS PORTAL
- Password protected
- No access for operators

How we achieved CLASSIC MODE*

- Deactivation of all Google services
- Addition of ecom apps based on SMT Apps Suite:
 - CALCULATOR
 - CLOCK
 - CONTACTS
 - DIALER
 - eFLASH
 - eRESET
 - eSENTINEL
 - GALLERY
 - SMS Messenger

Features

- Provisioning of a full-fledged Android phone
- Limiting the functions to those of a classic phone
 - Allowing access only to the necessary phone functions
 - Adding self-developed ecom apps, based on SMT suite
 - SMT apps do not have any connection to online services
 - All data is stored and remains on the phone locally
- Access to the settings menu to allow the user to personalize his phone

* Changing this eCSL named CLASSIC MODE during operation is not possible, because the connection between device and eDS PORTAL is deactivated. Nevertheless, customer-specific individual solutions can be realized, please contact an ecom sales representative and ask for a „corporate eCSL“ solution.
