# Guardian COVID Solution

Implement and Manage Social Distance

Companies need to launch a COVID response plan with concrete measures and actions, in order to make a safe return to work possible for all employees.
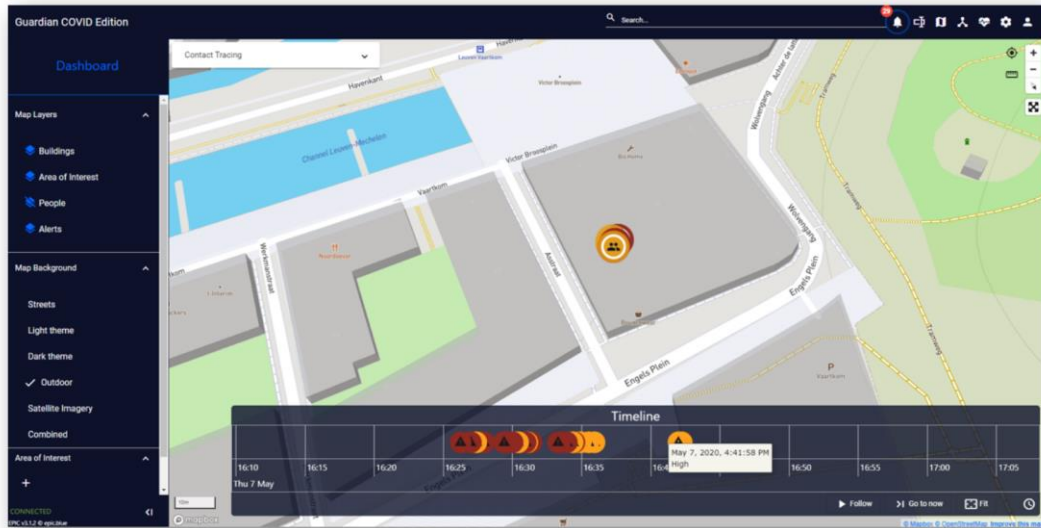

Social distance

Remind your employees to keep distance and to avoid unnecessary contact

- Install the app on a smart device of your choice. Privacy is guaranteed!

- Via a Bluetooth-based technology, Guardian COVID detects when two persons get too close for too long

- Alerts are triggered as an immediate warning to keep social distance

- These alerts and their locations are collected & recorded in the Guardian COVID platform

- The data can be used in three types of dashboards to enable Business Continuity & Operational Resilience

- It allows instant playback, contact tracing and generated heatmaps to identify hotspots

- Other technology can be integrated UWB, tokens, camera's,….
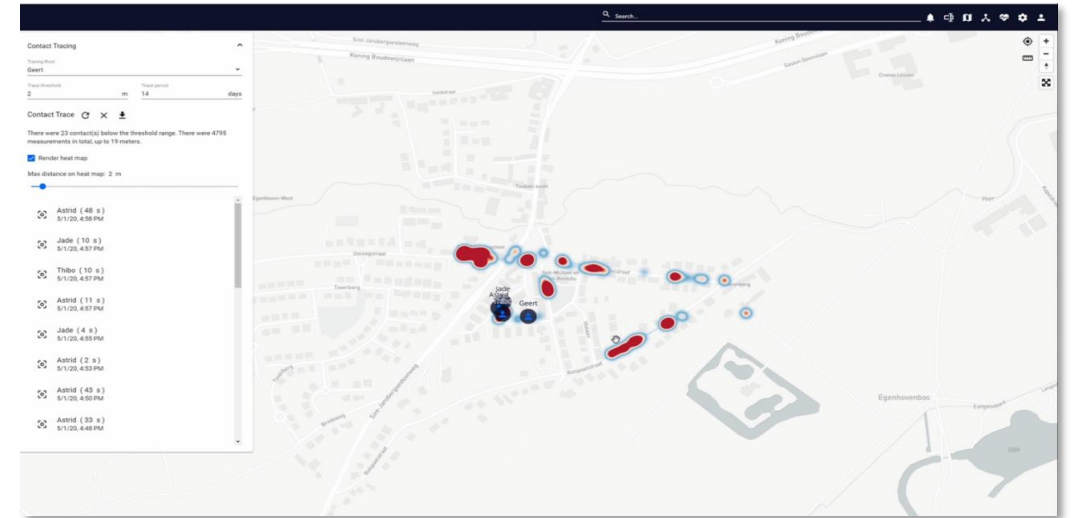

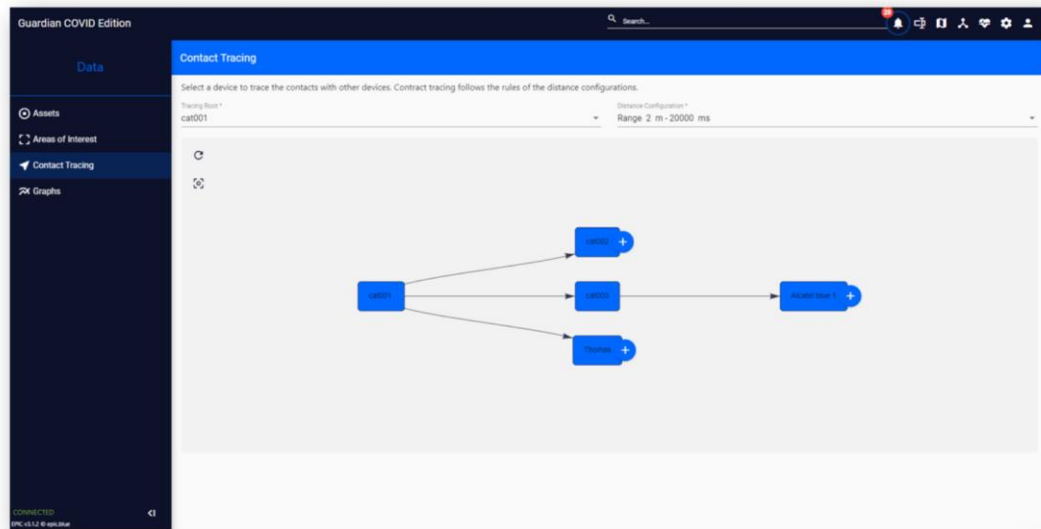

● ● ○ Alerting & KPI dashboard

Gain insights in whether the procedures are working through an user-friendly dashboard & modify where needed

- Proximity detections
- Combined Map and Time Filtering
- Alert locations recorded
- Real-time notifications
- Instant alerts playback

● ● ● Contact tracing

Act fast in case of an outbreak and avoid economical disasters

- Contact proximity heatmap
- Contact tracing graph

Unique Value Proposition

Boost productivity
