

# CamScan

CamScan is a “keyboard wedge” software utility which uses the integrated front/rear camera to scan barcodes, automatically converting them to human readable text. Triggering the scan is easy - simply press the Scan button added to the on-screen keyboard. Audible and vibration feedback is given when the barcode has been decoded. And, the decoded barcode data automatically appears in the data field where you need it.

Also works on Smart-Ex Series / Ex-Handy 209
